

Q. WAP - To implement Stack and Queues using Linked representation.

```
#include <stdio.h>
#include <stdlib.h>

struct node
{
    int info;
    struct node *link;
};

typedef struct node *NODE;

NODE getnode()
{
    NODE x;
    x = (NODE) malloc (size of (struct node));
    if (x == NULL)
    {
        printf("Memory full\n");
        exit(0);
    }
    return x;
}

void freenode (NODE x)
{
    free(x);
}

NODE insert_Front (NODE first, int item)
{
    NODE temp;
    temp = getnode();
    temp->info = item;
```

```

temp → link = NULL;
if (first == NULL)
{
    return temp;
}
temp → link = first;
first = temp;
return first;
}

```

NODE insert_rear (NODE first, int item)

```

{
    NODE temp, cur;
    temp = getnode();
    temp → info = item;
    temp → link = NULL;
    if (first == NULL)
        return temp;
    cur = first;
    while (cur → link != NULL)
        cur = cur → link;
    cur → link = temp;
    return first;
}

```

NODE delete_front (NODE first)

```

{
    NODE temp;
    if (first == NULL)
    {
